InLine® USB graphic card with audio, USB 2.0 to DVI / VGA / HDMI Adaptor, max 1920x1080

Art.-No.: 33281I

EAN: 4043718192823

This USB Graphics Adapter enables you to connect one more monitor, LCD or projector to a computer with a USB 2.0 port. For desktop users adding an extra monitor via USB connection is easier than ever without having to open the computer chassis to install an internal video card. With this handy adapter, you can enjoy many benefits brought by an add-on monitor. The most obvious one is that you get more desktop area to have more applications visible at one time. For example, you may work on one monitor while your family watching video on the other. No more stacking windows within the confines of a single display. Or you may span an application, e.g. spreadsheets, across two sides of displays. What's more, the adapter is hot pluggable. If you are not using the extra monitor, just unplug the adapter at any time, no reboot needed. You can connect up to 6 USB Graphics Adapters to a computer simultaneously.

- USB interface: USB mini type female. Bus-powered
- Plug & Play and Hot-plug - Add or remove monitor without system reboot
- Supported Display Interface: DVI-I 24pin + 5pin female
- DVI male to VGA female adapter included
